

JH6 Homework (100 points)

Create an Eclipse project named JH6_XXXXX where XXXXX is your NetID. For example: JH6_chasselb. Create the programs described below in this project. Fill in the required fields in the JH6_worksheet.txt file. Export your project file and upload it to blackboard as your work for this assignment. The worksheet file will be pasted into the blackboard comments section.

As you write your code make sure you adhere to the standards described in the rubric.

Get started early, and don't skip necessary video/lectures. If you find yourself stuck doing this homework assignment, first consider doing the practice work that would help prepare you for it.

Java practice files can be found on Blackboard.

Make sure you do your Class Participation (10 points)

family problem (45 points):

Create a package named family and check the instructions online on Blackboard

Run the Family program as specified in the JH6 instructions and insert the output into the appropriate section of the JH6 worksheet.

zoo problem (45 points):

Create a package named zoo and check the instructions online on Blackboard

Run the Zoo program as specified in the JH6 instructions and insert the output into the appropriate section of the JH6 worksheet.
