Rubric for JH6 Homework

In doing this assignment, make sure you satisfy the following "Rubric" :

1. In the appropriate worksheet entry, I want to see the output from your program. If your program is not working, please say so in the worksheet entry.

   DO NOT MAKE UP OUTPUT THAT DID NOT COME FROM YOUR PROGRAM .... BE HONEST. If I find that you have submitted Source Code that is not consistent with the Output that you claim came from your program, I will give you a zero on the whole assignment.
2. Properly Indent your code to reflect the logic of your program.
3. Use good variable names.
4. Once we have covered methods (after chapter 3), I will expect you to use methods to avoid putting all of your code in "main()".
